Magic: The Gathering Turn Structure by April King, L2 Judge (Minneapolis)

The table below shows the structure of a single turn from start to finish. The first column contains the five phases of the game, the second column has the steps that are in each phase, and the third column lists the actions that must be taken during that step, *in order*.

[^] Active player orders and adds their triggered abilities to the stack first, then the nonactive player orders and adds their triggered abilities to the stack.

^B Game checks for state-based actions first, *whenever* a player receives priority. Then, both players must pass priority in succession without the other player casting a spell, activating an ability, or taking a special action, for the turn to continue.
